Information on the Company

AltynGold's main assets are its 100% interest in the Sekisovskoye gold mine and its exploration site at Teren-Sai.

Both mine sites are based in north east Kazakhstan. In the most recent CPR in 2019 the Sekisovskoye site has proved reserves of 3.47Moz and probable reserves of 0.33Moz. In 2024, the Company sold 38,708oz increasing from the prior year of 32,765oz, production and profits have been increasing in line with the budgeted plan for the mine, and is targeted to be significantly higher in 2025 with the addition of the third line of processing. The mining licence for Sekisovskoye is valid until 17 July 2029, and the exploration licence for Teren-Sai until March 2026.

The Teren Sai Project is made up of a number of exploration targets in an area adjacent to the Sekisovskoye mine site. The Company is currently concentrating on the exploration site designated as Area 2, with a view to preparing this site for production during 2025. This will involve agreement of the production plan with the authorities prior to commencement of site preparation, with the initial extraction of gold being from open pit. At Teren-Sai the proved reserves amount to 0.8moz and probable reserves of 0.65moz. of the annual report.

AltynGold Plc (LSE:ALTN) is an exploration and development company, which is listed on the Main Market segment of the London Stock Exchange.
